# Blank Form – No Data Binding

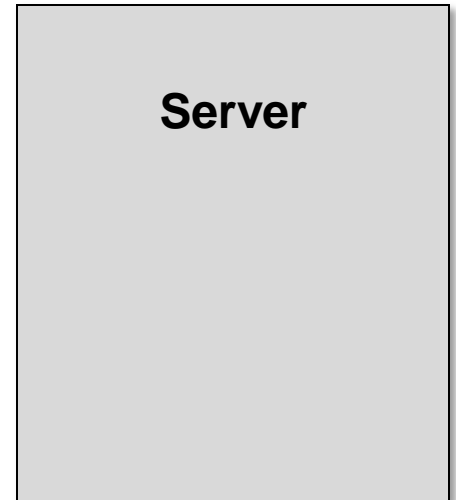

**Name**

**E-mail**

**Submit**

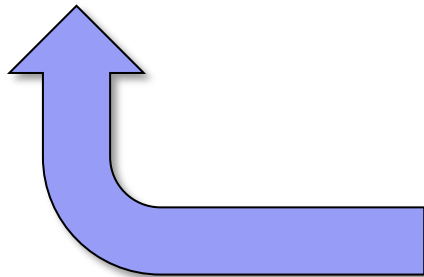

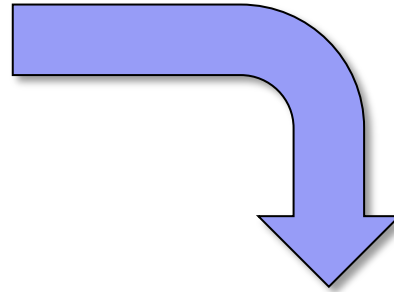

**HTTP POST or GET**

# Data Binding with a JavaScript Object

```
{  
  name: "Joseph",  
  email: "joseph@server.com"  
}
```

Submit

Name	<input type="text" value="Joseph"/>
E-mail	<input type="text" value="joseph@server.com"/>
<input type="button" value="Submit"/>	

# Introduction

- **Manual data binding**
- **Data binding with KnockoutJS**
- **Data binding with AngularJS**

# Summary

- **Manual data binding**
  - Using jQuery's `val()` method
- **Data binding with KnockoutJS**
  - Using `data-bind` attribute
  - Calling `ko.applyBindings()`
- **Data binding with AngularJS**
  - Adding data to `$scope`
  - Using the `ng-model` attribute on input fields
