Introduction

- **Set up a responsive form using Bootstrap 3**
- **Posting by the browser, or asynchronously with `jQuery.post()`**
- **Use ASP.NET to handle form data**
- **Add non-standard user input control data to a posting**
- **Using a promise to handle return codes from a post**

Summary

- **Set up a responsive form using Bootstrap 3**
- **Posting by the browser**
- **Posting asynchronously with `jQuery.post()`**
- **Add non-standard user input control data to post data**
- **Using a promise to handle return codes**
