A Webpack Intro for CSS

Jake Trent

@jaketrent   jaketrent.com

webpack.config.js

webpack.config.dev.js

```
module.exports = {

  entry: ['./filenames.js'],

  output: {
    path: '/a-directory',
    filename: 'my-bundle.js',
    publicPath: '/app-path'
  },

  module: {
    loaders: [{
      test: /file-regex/,
      loaders: ['transforms…']
    }]
  }
}
```
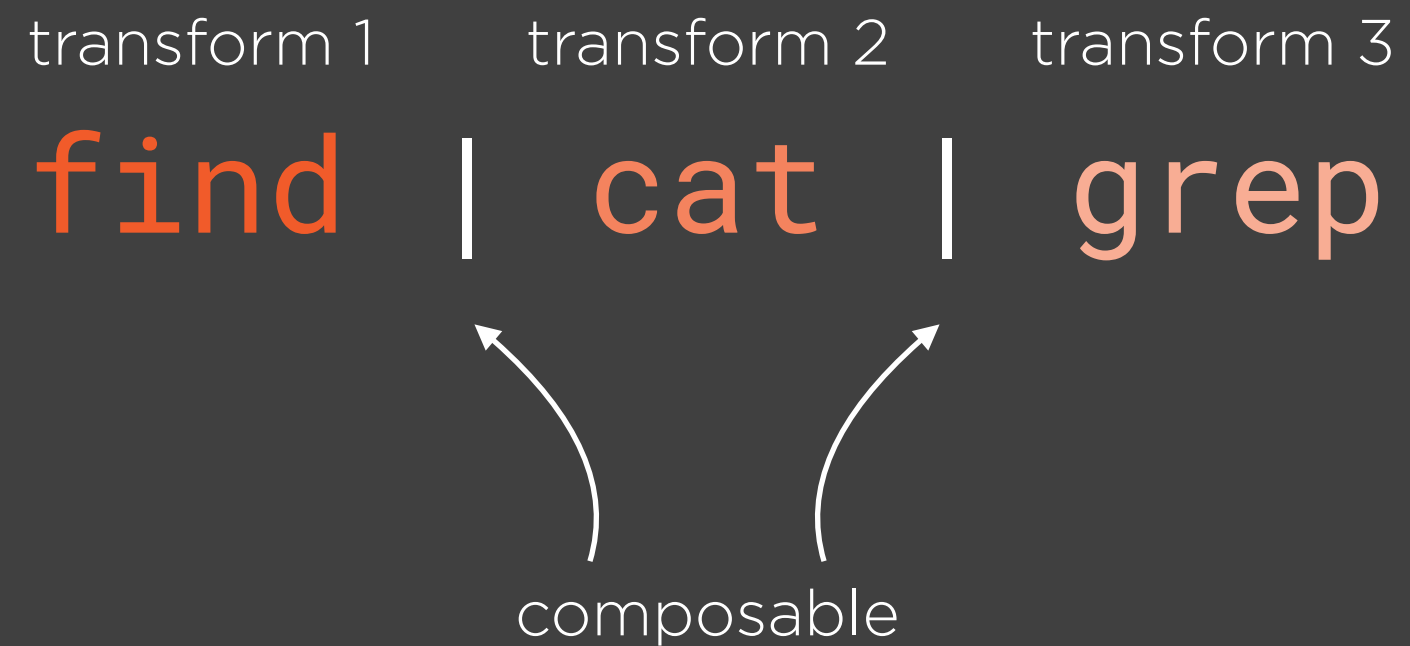

◄Itself, just a js module

◄Your app starting point(s) for tracing dependencies

◄Location of final output

◄Unix pipe-like transforms for loading different types of modules

entry

Loaders are like Unix pipes

transform 1 transform 2 transform 3

find | cat | grep

composable

{css} -> <style />

last   ⟵   first

['style', 'css', 'cssnext']
